

Instant Floor Graphics, Crystal Clear Window Graphics or Other POP Graphics Using Only a Pouch Laminator

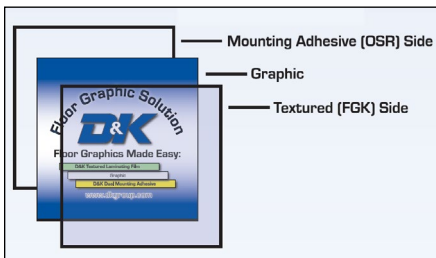

If You Have A Pouch Laminator, You Have A POP Sign System

Using virtually any type of printer and a 13" pouch laminator, you can crank out high quality graphics on-demand. Our Universal Sign Pouches feature a textured vinyl laminate on one side that meets U/L 410 requirements for floor graphic slip resistance, while the reverse side incorporates an optically clear high performance removable adhesive engineered for floor, window and countertop applications. The adhesive is formulated for easy removability without surface damage.

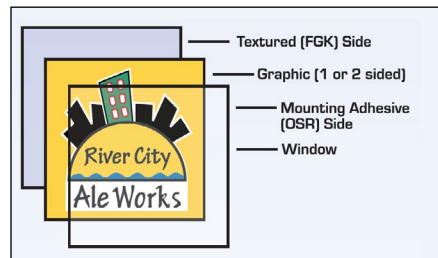

Versatile system allows multiple applications:

1. Floor/Countertop (Direct Installation)

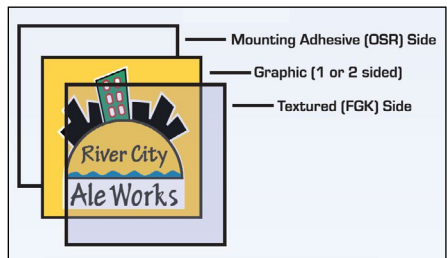

Mounting adhesive side applies to the surface with textured laminate protecting the top of the graphic.

2. Window Graphics (Inside Face Mount)

Front of graphic mounts to the inside inside of the window with optically clear adhesive, textured laminate protects the back.

3. Window Graphics (Outside Mount)

Mounting adhesive side applies to the outside of the window with clear textured laminate protecting the top of the graphic.

Four Pouch Sizes

- 9" x 12'
- 12" X 18
- 18.5" X 24.5"
- 24.5 X 36.5

Recommended pouch laminator

Akiles Prolam Ultra XL Series

More on reverse side

Components of the Universal Sign Shop System

Signmaking made easy. Insert the image into the pouch and place in the release liner. Feed the graphic sandwich into the roll laminator; remove, trim and install.

Textured Vinyl Side (FGK)

The textured vinyl surface meets U/L 410 requirements for floor graphic slip resistance. This layer adds protection and rigidity to prints while reducing glare from the sun and other UV sources. The SuperStick adhesive on this layer will stick to most digital prints and also features UV inhibitors to help prevent graphics from fading.

Mounting Adhesives Side (OSR)

Display pouches feature a two-sided adhesive system. One side contains a heat-activated adhesive that sticks to prints. The reverse side offers a removable pressure (cold-application) adhesive protected by a disposal liner. This adhesive surface can be removed from windows, floors, and counters without damage for six months.

Professional Production for Graphics Up To 18" x 24"

Akiles Prolam Ultra XL High Performance Pouch Laminator with Extra Large 19" Opening

An ideal production tool for cranking out signs and graphics with the Sign Shop in a Box, Akiles ProLam Ultra-X Series laminators possess superior quality and functionality combined with commercial grade design. Its multiple roller heat system produces professional, crystal-clear and bubble-free pouches every time.

Akiles' programmable memory settings allow operators to save ideal temperature and speed combinations for any job parameters while the patented internal cooling system ensures the laminator stays cool to the touch while in use.

Features

- 19 in. opening is compatible with extra large laminating pouches
- Control panel features backlit LCD display and labeled keypad for east operation
- Settings guide shows the recommended temperature and speed settings for different pouch thicknesses.
- Auto shutoff automatically cools and shuts down the machine after usage and prolongs equipment life.
- After shutoff, rollers run until the machine is 100°F, then the machine shuts itself off completely.
- Laminates substrates up to 14 Mil
