Titan

For foam board, coroplast, PVC, films, laminates, banners, textiles and magnetic sheeting.

Titan Flexible / Semi-Rigid Material Cutter

The Titan is a unique bench top cutter and trimming device. It was designed to cut a wide variety of rigid material and trim a wide range of flexible material. The Titan's one piece aluminum base and robust rail assembly incorporates both a blade cutting track for rigid material up to 1/2" and trimming base for roll stock flexible materials. The Titan delivers efficiency, accuracy and the added value of knife cutting and trimming on the same unit. It can be used to cut foam board, coroplast and PVC as well as trim Films, Laminates, Banners, Fabrics, Textiles and Magnetic Sheeting. Adapts to optional stand with waste catcher, roll holder and locking wheels and optional squaring arm.

Gemini Pro Flexible / Semi-Rigid Material Cutter

The Gemini is an affordable cutting/ trimming solution that will provide straight, square and clean cuts over its length. It was designed to cut a wide variety of rigid material and trim a wide range of flexible material. The Gemini Pro delivers efficiency, accuracy and the added value of knife cutting and trimming on the same unit. It can be used to cut foam board, coroplast and PVC as well as trim Films, Laminates, Banners, Fabrics, Textiles and Magnetic Sheeting. The Gemini pro adapts to the optional Atlas workbench to create a sturdy and durable cut station.
