

Full-color
Memjet® thermal
inkjet technology

Digital Full Bleed Color Printer Innovative Technology, Brilliant Full-Color Results

The ColorMax 7 Digital Color Printer uses the latest inkjet technology to produce full color output three times faster than traditional shuttle head printers, at one third the per-page cost. Its Memjet® print head has 70,400 ink nozzles and no moving parts, offering higher speeds, lower ink and maintenance costs and less noise. It produces full-color CMYK output, up to 16.8 million colors, on a variety of paper stocks and sizes, with full-bleed capability on media up to 8.5" wide. It can print 1600 x 1600 dpi at 6 inches per second, and 1600 x 800 dpi at 12 inches per second. It requires no heat or contact to create an image, so it can safely be used with pre-printed and window envelopes without damaging the window or marring the original image. High-capacity ink tanks and fully automated print head cleaning ensure optimum print quality throughout print runs.

Features & Specifications

Memjet® print head

70,400 color ink
nozzles means no moving parts

FEATURES:

- High-speed color printing for letterhead, invitations, postage and barcodes, window/non-window envelopes, invoices
