

FD 2084 AutoSeal® Pressure Sealer

The AutoSeal® FD 2054 is a fully automatic pressure sealer: the ultimate tabletop solution for processing pressure sensitive one-piece mailers. Designed for ease of operation and efficiency, the FD 2054 automatically detects and adjusts for 11", 14" and 17" forms. It features 5 pre-programmed standard folds for even panel C, V, Z and uneven/eccentric C and Z folds. It also has the ability to store up to 35 custom fold settings with the simple touch of a button.

The FD 2054 utilizes a drop-in three-roller feed system which produces dependable feeding of forms with no paper fanning required. Forms are processed at speeds up to 16,450 per hour, and are output to an integrated telescoping conveyor with automated nip roller positions, capable of holding up to 500 processed forms. The large 2.8" (71mm) backlit LCD display and user friendly control panel allow for untrained operators to walk up and start processing pressure seal forms with little to no instruction.

The FD 2054 advanced software allows for all standard fold types and paper sizes to be customized to meet your particular needs. Options include a fully enclosed cabinet for storage and 402 Series Joggers to reduce static electricity and align forms for proper feeding. These features combine to make the FD 2054 an ideal solution for streamlining your post processing.

FD 2084 AutoSeal® Pressure Sealer

• Up to 16,400 forms / hour

FD 1500 AutoSeal® Pressure Sealer

• Up to 85 forms / minute

FD 1500 AutoSeal Pressure Sealer

The FD 1500 AutoSeal® is the low volume solution for processing one-piece pressure sensitive mailers. Engineered with proven Formax technology, the FD 1500 provides an economical solution with the quality and reliability you expect from Formax. The sleek office design and ease of operation make this unit ideal for processing documents in an office environment with low volume applications.

A processing speed of up to 85 forms per minute plus the added capability of processing 14" forms give the FD 1500 the versatility needed to fold and seal virtually any low volume application. The drop-in feed system, clearly marked fold plates, LED indicators, and standard 6-digit counter complete the user-friendly package.
