

Verdi Twin – New!

The only of its kind with two multi-substrate cutters in one, the Verdi Twin acts as a power saw and as a pneumatic utility blade cutter. No adjustments, no replacements, no tools needed.

- Multi-roller design eliminates the awkwardness associated with handling large panels and prohibits smaller panels from slipping into roller gaps.
- 22mm or 7/8" cutting depth
- Versatile design means no cutting limitations on sheets of 5' x 10'; the Verdi can cut either the 5' or 10' side.
- The drive motor is mounted on linear bearings, eliminating vibrations and movements associated with standard screw-drive saw cutters.
- Belt-driven mechanism cuts 10' panels in seconds.
- Cuts Wood, Aluminum, Aluminum Composite, PVC, Acrylic, Corrugated Plastic, Foam Board, Honeycomb Board and more!

SteelTraK

Developed specifically for the tougher and thicker rigid and semi-rigid substrates used in today's sign making market, the heavy-duty SteelTraK handles oversized materials with ease. The SteelTraK casts no debris and provides a clean finished edge. It can be positioned right next to your printers without fear of airborne dust damaging the project or resulting in make-goods. All cutting tools are permanently mounted on the cutting head. Just turn the wheel and the Utility Blade, Scoring Blade, Glass Scoring Wheel, and Twin Wheel Cutting Tool is ready.

Make your SteelTraK even more versatile by adding the V-Groove Cutting Tool for POP and architectural signs and the Aluminum Twin-Wheel Cutting Tool which can cut up to .040 aluminum.

The SteelTraK is available in a 65" or 82" cut size and is backed by Foster Keencut's unprecedented 5 year general warranty on all parts (except blades, site-line strips and cutting wheels) and a 20 year warranty on the bearings used in the cutting head.

Excalibur 5000 & 1000x

The Excalibur 5000 features two cutting heads with four different cutting tools mounted on the same head for instant selection. The counterbalance ensures an easy glide cutting action, prevents damage when loading sheet materials, minimizes operator fatigue and increases production. The top Twin Wheel Cutting Head cuts 1/8" uncoated masonite and mat board. A standard utility blade accurately cuts Gatorboard, Sintra, honeycomb plastics up to 1/2" thick. The scoring blade is used for scoring acrylics and Plexiglas. The tungsten carbide cutting wheel scores glass up to 1/4" thick.

The Excalibur 1000x series vertical cutter features a single sliding head with 3 cutting and scoring tools ready for instant use. With a rigid clamping system and a set-for-life squaring mechanism, the Excalibur 1000X provides a noiseless, dust-free and cost effective cutting solution for materials used in a modern sign or graphic workshop.
