

**HD7100
HEAVY DUTY PUNCH**

**BindRite HD7100
Heavy Duty 14" Open Ended Punch**

Made exclusively for BindRite, the Rhinotuff HD7100 heavy-duty punch offers the following features:

Quick Change, Quiet Die System: New "Quietized" die technology reduces noise enough for office, bindery or print-for-pay environments. Change punch dies in just seconds – no bolts or tools

Durability: All-steel construction and heavy-duty gear box.

Power: Punches up to 30/40 sheets.

Jam Clearing: Auto-reverse electronics, plus manual reverse for back-up to minimize down-time.

Operating Choice: Foot pedal included; palm switch and automatic Versa Switch available.

Binding Modules for Coil, Wire, or

Onyx HD4170 Coil Inserter Module

Heavy-duty, dual powered system can handle even the largest-size coil jobs. Oversize rollers work equally well on small or large size coil, and adjust to make insertion easier. Built-in book sizer indicates correct coil size to use. Can mount on punch, or use side by side.

Onyx HD8000 Wire Closer Module

Open-ended flat bar closer manually closes twin loop wire for a professional look. Dual knob adjustments, when set for wire size, help to ensure properly closed element. Compatible with wire sizes up to 1 1/4". Durable all metal construction. Mount on punch or use side-by-side.

Onyx HD4470 Comb Opener Module

Enjoy the flexibility of comb binding with this all metal comb opener module. Binds all size binding combs, and features an adjustable comb sizer to speed production. Mount on punch or use side-by-side.

- One standard punch die included with machine
- Dies available for Coil, Wire, and Comb, plus many other hole patterns
- Made in the USA
