

RSH -380SL

15" Tabletop High Capacity Roll Laminator

The narrow design and portability of the RSH-380SL thermal laminator makes it perfect for laminating and encapsulating individual and multiple copies of prints, signage, presentations, menus, or any other short document runs.

- Large film roll capacity (up to 200mm / 7.9" diameter)
- De-Curling device for high quality when single-side laminating
- Double & Single (OPP film) thermal laminating function

RSH - 380SL

RSL - 2701S

RSL -2701S

27" Desktop School Laminator

The RSL-2701S is a full featured thermal encapsulator, capable of laminating up to 27" wide with speeds of up to 7.9 feet per minute. Designed with a small foot print for small working areas, it will laminate and encapsulate individual or multiple copies of posters, art work, training aids and other signage.

- The ideal laminator for the educational market
- Soft touch digital keypad allows for easy operation and function
- 3 Temperature Settings and 10 Speed Settings

RSL - 2702

27" Desktop Professional Laminator

This 27" compact tabletop laminator is great for both hot and cold lamination, encapsulating and mounting. Specifically engineered finish sheets printed on thinner materials, It features digital controls, independently heated silicone rollers and multiple set-up memory channels. It offers durable, sturdy frame construction, requires no assembly and minimal maintenance.

- Perfect for use by schools and most print and sign shops
- 9 Memory Channels to save the most often used settings into memory for quick access
- Dual Hot & Cold capability for both two-sided encapsulating and single-sided pressure sensitive lamination
