

FlexiCloser
Automatic Wire Closer

The Akiles FlexiCloser heavy-duty electric wire closer with a Smart-Detect feature automatically detects the wire size and adjusts the closing pressure accordingly. It features the industry's first smart-detect system, LCD control panel, safety sensor and a magnetic back that helps hold the Wire-O in place during the closing process, eliminating errors.

This easy to use machine is equipped with an LCD control panel with touch sensitive buttons. Safety sensors and auto-reverse feature provides risk-free, jam-free operation. The Akiles FlexiCloser is all wire sizes ranging from 3/16" to 1-1/2" in both 3:1 and 2:1 pitch. The FlexiCloser can be purchased with an optional mount that allows the machine to be mounted on top of the FlexiPunch modular machine.

FlexiCloser

WBM532

WBM532
Modular Wire Closer

The Akiles easy to use WBM-532 is a heavy-duty modular wire closer compatible with all standard binding wires (from 3/16" up to 1-1/4" in diameter, in either 3:1 & 2:1 pitch) and up to 14" in length and longer. Its simple-to-use design guarantees high productivity. Wire closer control provides fast and accurate setup. Its stand alone design mean no stand or holding device is required, while the open ended closing channel accommodates wire elements even beyond 14". The built-in diameter size selector and wire holder combine to make this machine unmatched in convenience. All metal construction assures reliability and years of worry-free operation.

CBM650
19-Ring Modular Plastic Comb Opener

This machine can be used as a stand-alone unit or in conjunction with the CombMac-24E, DuoMac and VersaMac. Its ambidextrous design allow it to be used by right or left-handed individuals. This machine allows you to open and close all standard size binding combs (from 3/16" up to 2" in diameter) and up to 14" in length. User friendly design and heavy-duty all metal construction guarantee maximum productivity and durability.
