

Brilliance™ Pressure Sensitive Overlaminates

Brilliance Pressure Sensitive Overlaminates provide a low-cost laminating solution suitable for indoor and outdoor applications. Brilliance laminating films contain UV inhibitors to reduce color shift caused by UV rays and are designed for short to medium term applications. These overlaminates are available in four standard finishes: Gloss, Luster, Matte and Canvas. Brilliance products feature a moisture-stable paper release liner and should be run with 120F heat assist for the clearest graphics possible.

FINISHES: Gloss, Luster, Matte and Canvas.

PSA Mounting Adhesives Double-Sided Pressure Sensitive

Pressure Sensitive Mounting Adhesives are two-sided products designed to adhere graphics to other surfaces including foam boards, acrylic, floors, windows and more. Mounting Adhesives are available in a variety of types to meet nearly any mounting application. Choose a permanent mounting adhesive for durable rigid graphics or a removable mounting adhesive for temporary signage including floor and window graphics.

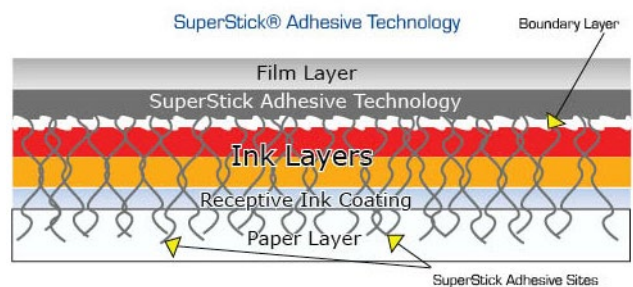

Pre-coated Mounting Board

MOUNTING ADHESIVES: General Purpose, Floor Graphics, Ultra White Opaque, Optically Clear, Economy, Pre-coated Board, Removable.

SuperStick™ Thermal Overlaminates

SuperStick Thermal Overlaminates feature the revolutionary SuperStick adhesive technology developed by D&K. This hybrid adhesive is designed to adhere to even the most difficult-to-stick-to photos and digital prints. SuperStick Thermal Overlaminates don't require a release liner and offer low activation temperatures (150F – 200F), making them ideal for sensitive prints.
