

Evolution-E2 – New!

The Evolution- E2 precision cutter combines all the features and functions wide format printers and sign makers need. It's accurate, easy to use, and can mount onto your existing table.

The heavy duty cutter bar clamps materials securely. Using a Graphix utility blade, it cuts everything from inkjet media to rigid substrates like Styrene and Gatorboard up to ½" thick. The new cutting head design provides bi-directional cutting with easy interchangeable cutting tools. Flip-over stops on both sides adds horizontal clamping to increase accuracy, prevent slips & reduce cutting time.

The Evolution- E2 mounts directly onto your existing table or work surface. Adjustable levelers ensure straight and accurate cuts to within .008" over the entire length. The lift hold mechanism is operable from both sides. Available in five practical sizes from 64" to 144" and is backed by Foster Keencut's unprecedented 5 year general warranty on all parts (except blades) and a 20 year warranty on the bearings used in the cutting head.

Sabre Series 2 GPC – New!

Designed to cut a wide range of sheet materials, the Sabre Series 2 offers a standard of straight, square and clean cutting. The new cutting head features a reversible Graphix blade making the Sabre Series 2 ideal for left-handed and right-handed operators. The blade locking thumb screw adds safety and convenience for blade depth adjustment.

The Sabre Series 2 is accurate to within .03" over the full length of the cut and is designed for use on a bench or attached to the optional stand. The innovative hinge and lift arm mechanism makes it possible to cut materials, which are longer than the length of the cutter. The extruded and silver anodized aluminum base incorporates a narrow groove to accept the blade tip when cutting.

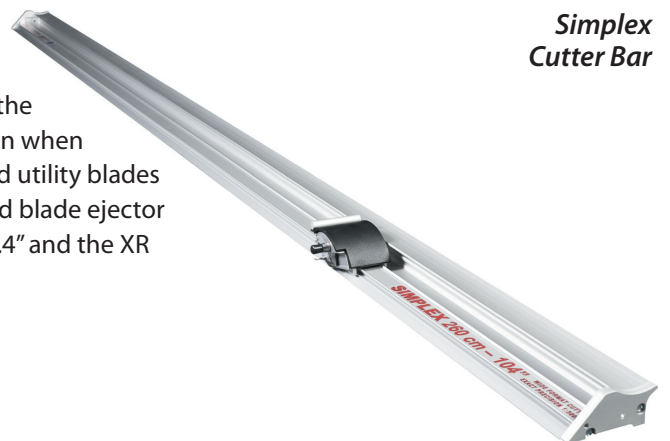

A full length silicon rubber grip strip mounted in the surface of the base and two more on the underside of the cutter bar ensures all work is held perfectly in place while cutting and provides protection for even the most sensitive surfaces. bearings used in the cutting head.

Simplex Cutter Bar - New!

The Simplex offers exact accuracy for general purpose cutting of wide format materials. The Simplex is accurate to within .03" over the full length of the cut and is an economical alternative to the Javelin when less extreme accuracy is required. Simplex cutter bars use standard utility blades while also featuring a blade depth adjustment and a spring-loaded blade ejector as standard. The medium duty utility blades will cut to a depth of .4" and the XR blades cut to a depth of .5".
