

HeatSeal® Ultima 35® EZLoad®

The HeatSeal® Ultima 35® EZLoad® is the next generation of roll laminating machines. The patented EZLoad design makes loading film quick and easy by simplifying and reducing film-loading time and preventing users from loading the film upside-down eliminating costly service calls.

This machine is packed with features including a thickness range of 1.7 mil to 5 mil NAP II film, one-minute warm-up and more. The Ultima® 35 EZLoad roll laminator provides crystal clear lamination everytime.

HeatSeal® Ultima® EZLoad® 12" Format Roll Laminator

Features:

- Continuous lamination allows multiple piece feed back to back and processing of legal size sheets
- 1 minute warm-up time
- Auto shut-off turns off after 1 hour of non-use
- Integrated trimmer
- Reverse switch
- Small footprint

HeatSeal® Ultima® 65 Tabletop Roll Laminator

- Most popular 27" roll laminator on the market.

HeatSeal®/Ultima® 65 Tabletop Roll Laminator

The Ultima 65 is the most popular, easy-to-use roll laminator on the market. This 27" tabletop laminator is perfect for a variety of applications. The Ultima 65 is an ideal solution to preserve posters, banners, tradeshow graphics, blueprints, maps, and more. Uses Ultima 65, a high quality, crystal clear film that ensures quality performance.

Features include: Simple keypad with variable temperatures and speed, easy film loading, reverse mode for jam release, stand-by mode, auto shut off, retractable trim blade and ready signal.

Catena Series Moerate Production Roll Laminators

Designed to encapsulate and mount prints from color printers and copiers, the Catena Series provides a simple way to finish your full-color digital output. These models feature heated rollers that can also run pressure-sensitive films for moderate laminating production.

CATENA 35

This compact laminator is designed to provide safe and convenient lamination in offices and small print shops producing 8.5" x 11" prints.

CATENA 65 & 105

When productivity and profit count the most, the Catena 65 and 105 meet the requirements of your more demanding jobs. These larger units are able to handle a wider variety of applications including standard poster-sized prints.

Catena Series Moderate Production Roll Laminators

- Models for sizes from 8.5' x 11" to poster-sized prints.

Pinnacle 27 EZLoad™ Roll Laminator

- Laminates graphics up to 27" wide
- AccuTherm™ heating technology

Pinnacle 27 EZLoad™ 27" Roll Laminator

The Pinnacle 27 EZLoad™ is a versatile 27" wide-format laminator perfect for laminating presentations, signs, charts, large photos & more. The patented EZLoad film loading method makes loading film foolproof. And AccuTherm™ heating technology provides the most consistent lamination quality with the highest clarity, even on long runs. Uses NAP I hi melt or NAP II lo melt film. Great for banners posters and school projects.

Features: Fast warm up time of less than ten minutes, integrated temperature gauge/ footage counter and built-in horizontal trimmer. Film up to 3 mil thick.

HeatSeal® H600pro

If you're looking for a professional system that can handle laminating projects up to 13" wide, the H600pro is for you. It's ideal for all of your presentations, signs, menus and certificates. And, with six speeds and four rollers, you'll get bubble-free results every time.

Features: High-performance digital display features temperature and speed controls, laminates up to .10" thick mounting boards, one-touch keypad with LCD readout, adjustable temperature with cooling fans, variable speed controls, reverse switch, hot or cold lamination.

HeatSeal® H600pro 13" Pouch Laminator

- Laminates graphics up to 13" wide

- Laminates graphics up to 18" wide
- Hot or cold lamination

HeatSeal® H700pro 18" Professional Pouch Laminator

HeatSeal®/HP700 18" Professional Pouch Laminator

This versatile, high-volume system is perfect for offices that need to laminate large items, such as banners, posters and mounted signs up to 18" wide. It has nine speeds and four rollers, so you're sure to get the smoothest, cleanest results.

Features: Digital display with pre-set modes, finger-tip speed and temperature controls, laminates mounting boards up to 10" thick, one-touch keypad with LCD readout, adjustable temperature with cooling fans, variable speed, reverse switch and hot or cold lamination.
