

DocuCopy® Copier Tabs

DocuCopy® copier tabs are blank index tab dividers designed to be printed on-demand in tab-capable digital copiers or printers. With a wide selection of cuts and collations, DocuCopy® copier tabs are available as economical paper tabs or our exclusive laminated Trilar™ tabs. Trilar™, a toner-receptive film, is available in clear and color film options. Gen2 Trilar™, our newest offering, is designed for superior performance with polymerized toner equipment.

DocuCopy® Reinforced Business Papers

DocuCopy® reinforced business papers are designed to keep your bound documents secure. Reinforced lightweight sheets won't tear out of the binding system. Because the reinforcement is indented into the sheet, it adds no thickness to the paper, making it run as easily as plain copier paper. DocuCopy® reinforced business papers are available in a variety of paper weights and sizes with 3 holes, or no holes for inline punching or other binding formats.

DocuCopy® Integrated ID Cards

DocuCopy® integrated ID cards feature Trilar™. The cards are not tipped on, but part of the sheet, allowing you to print variable information on both sides of the card in one pass. Custom options include card size, shape and placement, paper types and sizes. Four color pre-printing is also available to help the customer reduce color click charges. DocuCopy® ID cards are a cost-effective alternative to plastic cards and great for many applications including membership cards, insurance and medical cards, marketing pieces and more.
