

Fastback® 20

Fast, versatile, durable tape binding

The FB20 is the ideal binding machine for all corporations, financial institutions, copy shops, print environments, or education establishments that require professional-looking presentations, year-books or bound documents at a fraction of the time required to bind with alternative binding solutions such as coil, comb, or wire. This machine offers unprecedented ease of use with its LCD display that guides the user through each operation using animated illustrations. The Fastback 20 works with all of the Powis binding materials, from the versatile Super Strip to the customized Image Strip to the Perfectback Strips for perfect bound books. It can create anything from a simple report to a 350-sheet hard cover book.

Fastback® 9

A Stronger, Better Alternative to Coil or Comb Binding

The versatile Fastback® 9 is the most compact and affordable binding machine that Powis makes. Its (13"x19.5") desktop footprint is small enough to fit the most cramped conditions. The Fastback 9 handles tape binding, Image Strip™ binding, and hardcover book binding. It is a great choice for the small office/home office (SOHO). It's also suitable for companies that do not have a central copy shop, and require that each department handle its own binding. In spite of its size and price point, the Fastback 9 is a powerful machine that can produce finished binding 3.5 times faster than traditional punch-and-bind systems. It binds from 10 to 250 sheets and is perfect for short-run and occasional jobs.
